PROFILE

Security engineer who turns process into platforms: tested software, CI/CD, and human gates on the risky steps. MSc thesis: an OpenAI-compatible AI Security Gateway (inbound threat detection, DLP, routing). At Swisscom I run DevSecOps for 1000+ developers and high-assurance Vault operations. CAISP; MSc Cybersecurity; MSc Artificial Intelligence (thesis deposited, pending defense). CISSP in preparation.

EXPERIENCE

DevSecOps Engineer & Scrum Master

10.2022 – Present

Swisscom · Rotterdam

- Designed an OpenAI-compatible **AI Security Gateway** (MSc thesis, deposited): reverse proxy with inbound threat pipeline (sanitisation, OWASP-style filters, LLM-as-judge || DistilBERT), reversible DLP, routing and outbound checks. Evaluation **17/17 PASS**; ~175 pytest. github.com/r4fik1/ai-security-gateway.
- Built an LLM-assisted **threat-modeling pipeline** (diagrams → STRIDE threats and mitigations with mandatory human review), combining CTMP practice with CAISP labs on prompt injection, RAG and agent/tool risks.
- Integrated **SAST, DAST, SCA, secrets detection and IaC scanning** (Trivy, Checkov) into GitLab CI/CD used by **1000+ developers**; policy-as-code with OPA; findings fan-in to a system of record (SBOM / CycloneDX).
- Led enterprise **HashiCorp Vault**: Kubernetes + Terraform, dynamic secrets in CI/CD, least privilege. Wrote a Go CLI that turns rekey / generate-root **key ceremonies** into a tested, cross-platform workflow with GPG/YubiKey human gates (coverage gate ~95%).
- Delivered security-transparency products in Python (metrics, maturity, scheduled BI) so leadership sees training, assessments and vulnerability posture without spreadsheet archaeology.
- Scrum Master: servant leadership, flow and capacity for security-platform work.

Application Security Engineer

07.2021 – 09.2022

Aegon Insurance · Madrid

- Owned AppSec services across platforms: secure code review, SAST/DAST (Kiuwan), vulnerability and pentest remediation, security requirements with architecture and business, IT security metrics.

Cyber Security Analyst

01.2021 – 07.2021

Between Technology · Barcelona

- Security in delivery projects: vulnerability testing of applications and infrastructure (C++, .NET, PHP), data-protection and encryption controls, risk reports.

Test Manager

02.2019 – 01.2021

Giesecke+Devrient Mobile Security · Barcelona

- Test design and automation (C++), environment setup, defect analysis, Scrum with Jira/Confluence — in a mobile-security product context.

EDUCATION

Master's Degree in Artificial Intelligence (Data Engineering track)

2025 – Present

UNIR — Universidad Internacional de La Rioja · Thesis deposited, pending defense: AI Security Gateway

Postgraduate Certificate in Data Engineering

2025 – Present

UNIR — Universidad Internacional de La Rioja

Master's Degree in Cybersecurity

2019 – 2021

UNIR — Universidad Internacional de La Rioja

Bachelor's in Telecommunications Engineering (Electronic Systems)

2013 – 2019

University of Valladolid (UVa)

CERTIFICATIONS

- **CAISP** — Certified AI Security Professional
- **CTMP** — Certified Threat Modeling Professional
- **CASP** — Certified API Security Professional
- **CCNSE / CCSE** — Cloud Native & Container Security
- **CDP** — Certified DevSecOps Professional
- Internal Auditor ISO 27001:2013 (TÜV Rheinland), 2021 – expired 06.2024
- **CISSP** — in preparation (not yet certified)

SKILLS

AI security: OWASP LLM Top 10, prompt injection, guardrails, DLP, STRIDE, LLM-as-judge, evals

AppSec / SSDLC: SAST, DAST, SCA, SBOM, Semgrep, Trivy, ZAP, DefectDojo, Dependency-Track

Platform: Kubernetes, Terraform, OPA, HashiCorp Vault, GitLab CI, Docker

Engineering: Python, Go, Bash · pandas/Parquet for security metrics

LANGUAGES

Spanish C2 (native) · English C1 · German A2 (in progress toward B1)

SELECTED RECOGNITION

Telefónica ElevenPaths wireless-security study · Spanish IP filings (sensor data logger + companion app) · Santander Explorer 2019 · PROMETEO awards 2019 (×2). References available upon request.
